

Gas Turbine Generator Applications

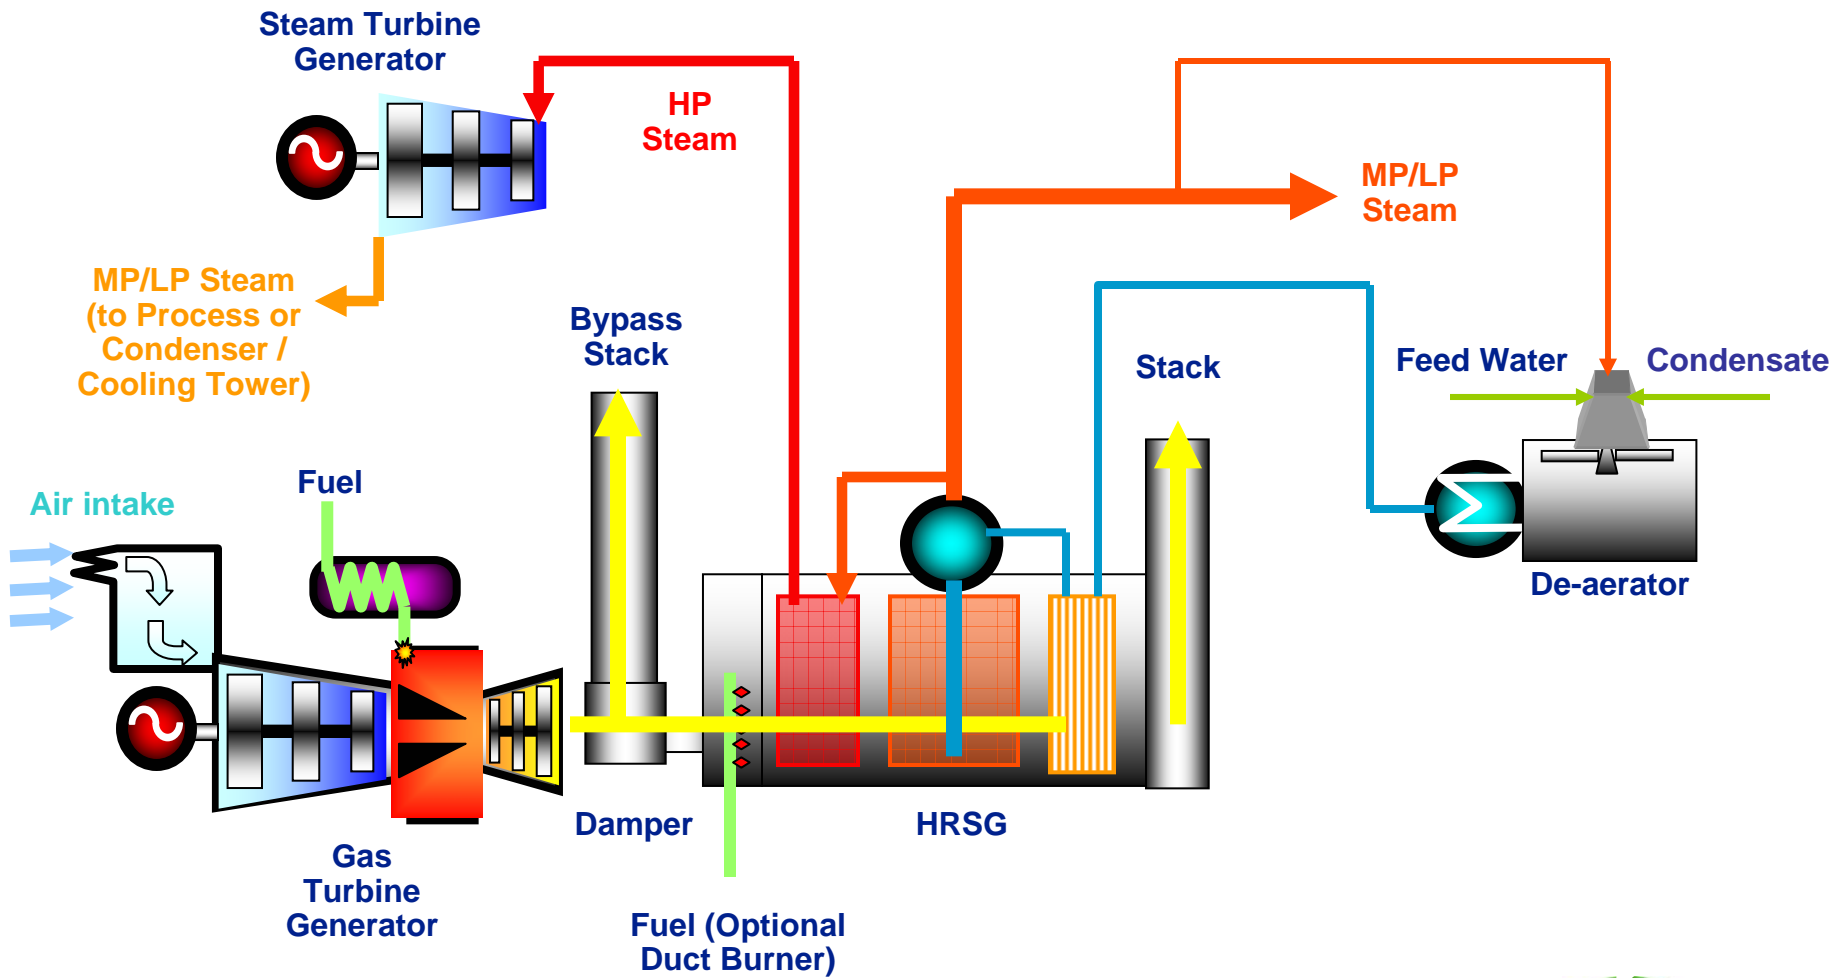

Best GTG Applications

- CHP
 - > Requires High Quality / Quantity Heat Source
 - > Requires Chilled Water Production
 - Steam to Chilled Water
 - Exhaust to Chilled Water
- Combined Cycle Power Generation
 - > HRSG (w/Supplemental Firing)
 - + Steam Turbine → 48%-50% Efficiency
- Dual Fuel Power Generation

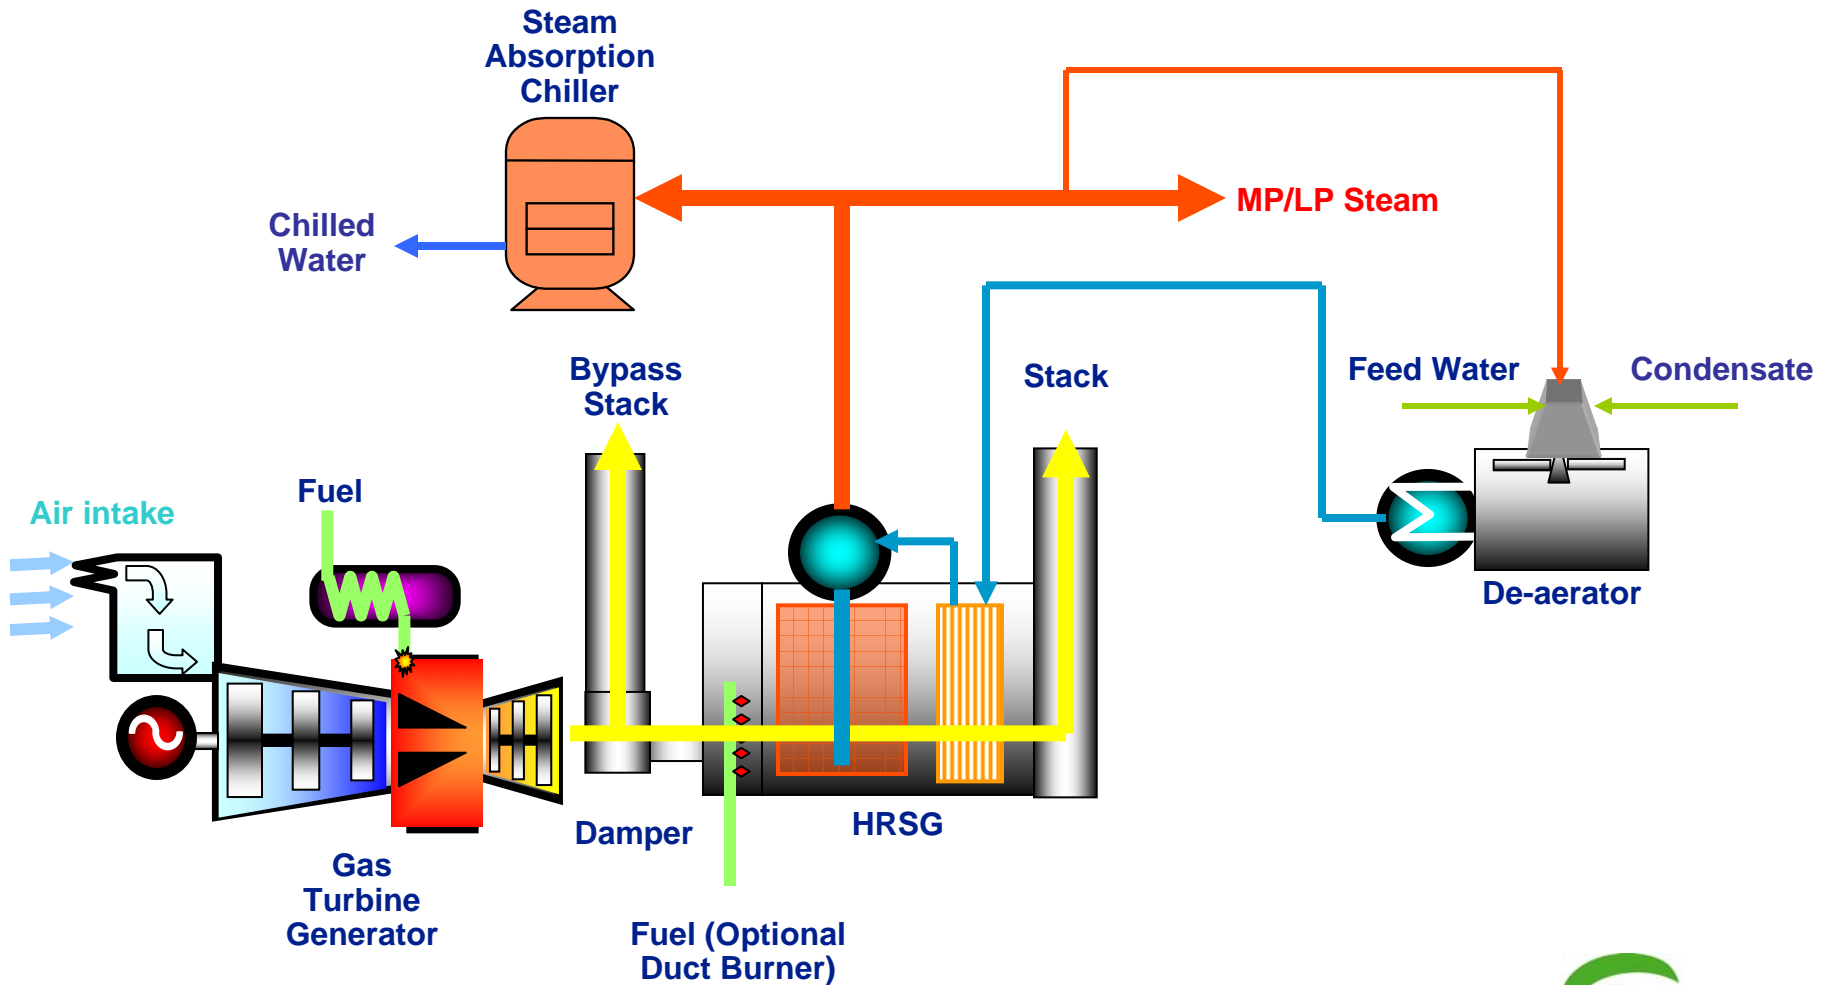

CHP (with Steam)

CHP (with Steam Turbine)

CHP (with Steam & Chiller)

CHP (Exhaust Fired Chiller/Heater)
